Rise of the Sidenah

North American Book Awards Winner

She followed her passion. Was she wrong?

A young sculptress is forbidden from practicing her art, until a powerful man offers her an opportunity she can't refuse. With promises of a new life, he draws her into a world of deceit and betrayal, until she's accused of murder and confined to the dungeon in the depths of the mountains. She manages to escape, only to have the man she loves encourage her to engage her enemy in a final battle to save her family, and to prove to herself once and for all who she really is.

All she wanted was to carve the white stone. How could she have known what would happen?

C. M. Story is an author of imaginative fiction and a full-time freelance writer, editor, and ghostwriter. She's also a musician, playing French horn in several area music groups, and the founder of "Writing and Wellness," a motivational site for creatives.

Rise of the Sidenah was inspired by gothic architecture, a tune by "The Calling," and the idea that following the heart may cause pain, but is the only way to truly fulfill one's purpose in life. Find more about C. M. and her other writing adventures at cmstorybook.com.
